Free mobile phone & remote monitoring software supplied with DVR!

Ideal for Department Stores and Councils!

alienmax Perfect for high-end retail and public sector installations using up to 16 standard analogue cameras. The new alienMax DVR boasts all the extra features the alienHybrid has but without the capability for IP cameras.

Real-Time all Channels	D1 Recording	Remote Internet	Live Images on a Mobile	Device Control	Email Notification	Network Back-Up	Remote Local Back-Up	Remote Data Store	HDD Management
Up to D1 Resolution	Multi-Ch Playback	Intelligent Recording	Electronic Mapping	PTZ Control	2 zone Talkback	Auto Time Synch	Instant Detective	High Definition	VoiceOFF Ready

Video Analytics Instant Detective

Instant Detective is a great feature for recordings captured in busy public places such as stations or airports as it can be used to limit the time spent by an operator or the police reviewing hours of recorded footage. This superb feature is exclusive to the alienHybrid and new alienMax range.

For example, a car is stolen from a car park..

Instant Detective allows the CCTV operator to select the area in the camera's image where the car had been parked and look for video motion detection within a given time slot that occurred only in the depicted area. Any activity within that area of the camera's recorded image can quickly be accessed and saved for vital video evidence.

Exclusive to Max & Hybrid alienDVRs

DVRs - alienMax 16 Channel

Up to D1 Resolution

alienMax can record in real-time 25FPS on all channels in D1 resolution, DVD quality 704x576, which means you'll never miss a thing.

Control Devices Remotely

Using the CCTV Window software, you can remotely control up to 4 relays from anywhere in the world. Floodlights, electric gates, a bell box or a sounder can be switched on and off using this superb feature.

Email Notification of an Alarm Event

Be alerted of a visitor or an intruder at home when you're at work, from your business when you're not there or wherever you are in the world! The DVR sends an email with 3 JPEG attachments showing the "activated" CCTV camera image taken before, during and just after the alarm event occurs.

Additional - alienMax Features

Instant Detective

Instant Detective is a great feature for recordings captured in busy public spaces such as stations or airports as it can be used to limit the time spent by an operator or the police reviewing hours of recorded footage.

2 Zone Talkback

2-way audio channel allows you to talkback to 2 separate areas under surveillance using an external speaker such as the VoiceOff (VOX200).

Priority HDD Management

Allocate key cameras a drive for recording whilst remaining cameras are left with the remaining drives to share. Giving extended recording time to the key camera. In effect each camera can be given a certain amount of it's own disc space.

Duplicate Drive Recording

alienMax has a "Duplicate" drive recording facility, where the DVR can be managed to make 2 drives record the same images, thus creating a back up within the DVR itself in case of a hard drive error.

File Lock

If an immediate copy of evidence cannot be made, the DVR has a "File Lock" facility to prevent a recorded file from being overwritten completely. This can be unlocked once it is certain that a copy has been made.

High Definition Multimedia Interface

The alienMax supports full HD displays giving you crisp, high quality CCTV images with superb colour definition and no compression loss.

Specification

Model		16Ch
Video Inputs	Analogue Channels	16
		BNC
